

12. - 13. NOVEMBER 2014

LED TECHTALK AT IST METZ

LEDs are small and compact, produce comparatively little heat and no ozone. In lighting technology they have already started their triumph, and for several years their use in the printing industry has been discussed. Will they replace conventional UV technology? For which applications are they suitable? When is a retrofitting worthwhile? At the LED Tech Talk of IST METZ GmbH we provide a realistic assessment of advantages and use of the new technology. IST METZ has positioned itself successfully in this market over the last years and offers a wide range of LED UV systems.

In short speeches experts from IST METZ and its partner company Integration Technology Ltd. (ITL) talk about the current status of LED UV technology in various printing processes. Practical demonstrations on the in-house printing presses add to the agenda. The subsequent panel discussion offers the possibility to deepen some topics. The event aims at representatives from printing press manufacturers, print shops and the trade press.

Agenda

Wednesday 12.11.2014 (language: English), Thursday 13.11.2014 (language: German)

09:30 - 09.45	Welcome	Dirk Jägers, IST METZ GmbH
09.45 - 10.30	LED portfolio	Holger Kühn, IST METZ GmbH
10.30 - 11.00	LED ink technology	Dr. Erich Frank, VDL Verband der deutschen Lack- und Druckfarbenindustrie e.V.
11.00 - 11.10	LED UV for sheet fed	Manuel Blauensteiner, IST METZ GmbH
11.10 - 11.20	LED UV on roll to roll	Volker Selg, IST METZ GmbH
11.20 - 11.40	Coffee break	
11.40 - 11.50	LED prepared	Joachim Hildebrandt, IST METZ GmbH
11.50 - 12.00	LED UV for Inkjet	Adrian Lockwood, Integration Technology
12.00 - 13.00	Lunch break	
13.00 - 13.30	Print demonstration LED UV in sheet fed	Stefan Feil, IST METZ GmbH
13.30 - 14.00	Print demonstration LED UV for Flexo	Stefan Feil, IST METZ GmbH
14.00 - 15.00	Panel discussion	
15.00 - 16.00	Discussion, questions, company tour
